

Title: Project partner finder**Background:**

-When doing some project for a college assignment or as a personal project; we can benefit from the collaboration from people in our field or similar fields, but networking can be difficult specially with so many online courses.A13

**Target(s)/Goal(s)**

-Create a platform where people can share an exercise they have issue solving or their project ideas asking for help.
 -The goals is to eventually showcase the finished project and earn points to measure your success as a partner, and for other people to learn.

**Analysis**

-It is difficult to take the time to network with other students, especially those from different faculties.

Name: Edwin Vega Date: 29/8/2022

Proposed Countermeasure(s):

- Create a website that allows a user to post details on the project they are working on with an image.
- Then other users can comment below that post as an observer or join the group if invited by the project creator.
- Each project can have a feed of public posts and a completion status and a private chat between the members.

**Check and Evaluate:**

- Is this tool really necessary with paid services for tutoring and many group chats?
- Are people willing to collaborate with strangers on a project idea or a homework assignment?

**Act:**

- Is the platform going to be used for other purposes and if so how can we gather feedback from the users?
